SHIKHA TRIPATHI

Data Analytics with AI

Delhi NCR, India | +91 8882688420 | dawithshikha@gmail.com | www.linkedin.com/in/shikhatripathi01

PROFESSIONAL SUMMARY

Aspiring Data Analytics with AI professional, skilled in Python, SQL, Excel, and Power BI/Tableau, with a growing foundation in machine learning and AI-driven analysis. Experienced in cleaning raw datasets, running exploratory analysis, and applying basic predictive models to turn data into clear, actionable insights. Certified in Data Analytics with AI, IBM Data Analytics with Python, and Advanced Excel. Looking to start a career where I can combine analytical thinking with AI tools to support smarter, data-driven decisions.

TECHNICAL SKILLS

- Programming & Querying: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (joins, aggregations, subqueries)
- AI & Machine Learning: Machine Learning Fundamentals (Regression, Classification), Artificial Intelligence Basics, NLP Concepts, Predictive Modeling, Generative AI Awareness
- Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Trend Identification, Descriptive & Inferential Statistics, Probability
- Visualization & BI Tools: Power BI, Tableau, Excel (Pivot Tables, VLOOKUP), Google Sheets, Dashboard Design
- Other Tools: Jupyter Notebook, Git, GitHub, MS Office

PROJECTS

Customer Churn Analysis | SQL, Python

- Cleaned and preprocessed customer subscription data using Python and Pandas to improve data quality.
- Performed feature engineering and exploratory data analysis (EDA) using Python and SQL to identify churn patterns and customer behavior.
- Analyzed customer retention metrics, identifying a 28.6% churn rate and 71.4% retention rate.
- Evaluated revenue performance, identifying ₹18.8 average revenue per user (ARPU) and 18% revenue loss due to churn.
- Compared subscription-based churn rates, revealing 55.6% churn for monthly plans vs. 8.3% for annual plans.
- Created data visualizations using Matplotlib and Seaborn to explore churn trends, customer segments, and relationships between customer escalations and churn.

Chocolate Sales Analysis Dashboard | Power BI

- Developed an interactive Power BI dashboard analyzing $6M in total sales, 326K boxes sold, and approximately 1K shipments.
- Visualized $3.56M in total profit and $2.14M in total costs using KPI cards and interactive charts.
- Analyzed product-wise sales, profitability, and performance across geographical markets using interactive filters.

Created sales trend charts and shipment distribution visualizations to support data-driven business decisions.

Swiggy Sales & Customer Analysis | Personal Project | MS Excel

• Identified top-performing cities, states, food categories, and sales periods through trend and comparative analysis.

• Built an interactive Excel dashboard using Pivot Tables, Charts, Slicers, and KPI cards to track ₹53.01M sales, 197.43K orders, and 5.59M ratings.

• Analyzed 197K+ records across 14 columns to uncover sales, order, rating, city, and state-level insights.

EDUCATION

B.A. in Political Science (Honours), Delhi University *2026*

Intermediate (12th Grade), Government Girls Senior Secondary School *2023*

CERTIFICATIONS

- Data Analytics with AI — Ducat
- IBM Data Analytics with Python — IBM
- Advanced Excel
